

X-BORDER PAYMENTS OPTIMIZATION TRACKER

A MONTHLY UPDATE ON THE TRENDS AND PLAYERS
DRIVING CROSS-BORDER PAYMENTS

NOVEMBER 2015

Cross-Border Commerce Drives Global Acquisition Agenda

Buy versus build is an age-old conundrum that companies face as they evaluate market and product expansion. Judging by the level of merger activity in the global payments space of late, the pendulum is swinging much more towards the buy than the build.

But why?

At a macro level, one key driver, of course, is the continued rally in the U.S dollar, which makes it cheaper to buy just about anything outside the country, from handbags to vacations to payments companies. The move to expand on a global scale thus looks opportune as the dollar is at its strongest levels seen in more than a decade. Industries such as the food and beverage industry, dominated by Hain, and cargo, marked by FedEx, have sported multi-billion-dollar merger announcements as the price seemed right to pull the trigger on, respectively, Mona and TNT Express.

But more fundamentally, the momentum around the wave of deals, at least in the payments industry, is threefold: The lure of finding new sources of customers and thus incremental sales, the massive number of people around the world with mobile devices who can access merchants who do business online, and the need for the technology that makes serving those customers possible.

In the mergers discussed below, the key has been the ability to both expand capabilities that already exist, as well as expand the number of global endpoints that can be served to enable global commerce. The “buy, rather than build” mindset, also means speed to market, and hopefully, to critical mass. Acquiring firms that have both market penetration and technology in place is a fast path to both.

The biggest wave came just recently with Visa’s announcement to pay up for its sister organization, Visa Europe, in a \$23 billion deal. That announcement has been rumored since May of this year, and Visa publicly declared its interest in bringing Visa Europe into the fold, in an effort to shore up competitive outposts beyond the pond against MasterCard and financial technology upstarts and offer all Visa cardholders the same set of products and services, particularly digital products and services that make transacting across borders seamless for consumers and merchants.

That payments deal, among two marquee names, also sports one of the biggest price tags, but there are also a few smaller ones, noteworthy less so for headline dollar amounts than for strategic overtures.

Cross-Border Commerce Drives Global Acquisition Agenda

ACI Worldwide is ponying up eCommerce company PAY.ON for a hybrid stock and cash consideration of \$200 million. The deal broadens the digital footprint across 160 countries, and for ACI, deepens the portfolio to reach across alternative payments and card acquirers – and here, specifically the gaze is on cross-border transactions, especially in omnichannel. As has been estimated, the eCommerce market has been growing at roughly a high teens growth rate, and will do so through at least the next few years.

Buoyant on investing environment, Worldpay made its [debut](#) on the London Stock Exchange as U.K.'s largest IPO of the year. The payments processing firm is looking at a market cap of £4.8 billion (\$7.3 billion) on £2.40 a share (\$3.66). Payments firm Adyen landed another round of financing, bringing its value up to \$2.3 billion – is this a move to build up a war chest to buy up companies?

Additionally, Evo Payments International [acquired](#) Citigroup's merchant acquiring business in Mexico for an undisclosed amount in September. The [payment acquirer and payment service provider](#) announced that, as part of the deal, Banamex and EVO entered into a 10-year marketing alliance agreement that involves an exclusive referral arrangement for card acquisition and all products connected with Banamex's merchant customers.

WHAT'S INSIDE

The first step toward making cross-border trade flourish is to create a framework for money to exchange hands and making sure that the framework functions.

It does not stop with just facilitating cross-border payments. Different stakeholders are always on the bend to make the exchange seamless, smooth and secure. Ecommerce Europe rolled out Trustmark, a protection [standard](#) for merchants and consumers engaging in cross-border transactions with more than 10,000 certified online shops. Trustmark aims to simplify the communication process between merchants and consumers in the highly fragmented European eCommerce market and by having consumers file complaints in their own language.

IBM revved up its real-time [payment](#) processing with Financial Transaction Manager, allowing banks to converge their Society for Worldwide Interbank Financial Telecommunication (SWIFT) payment operations onto a single hub to improve operational efficiency and expedite transactions. SWIFT integrates payments across different currencies, platforms and transaction types.

But checks and balances introduced to keep things in order sometimes have unintended negative consequences. Rules that were introduced to stop money laundering and other illegal activities might be leading to banks scaling back interbank partnerships that facilitate cross-border payments and reduce the cost of stringent Know Your Customer (KYC) checks.

Considering payments are a \$1.3 trillion business for banks and projected to grow to more than 36 percent of total revenues by 2017, central bankers worry these trends may be [fragmenting](#) the global financial system and excluding less developed markets and countries from the benefits of cross-border payments.

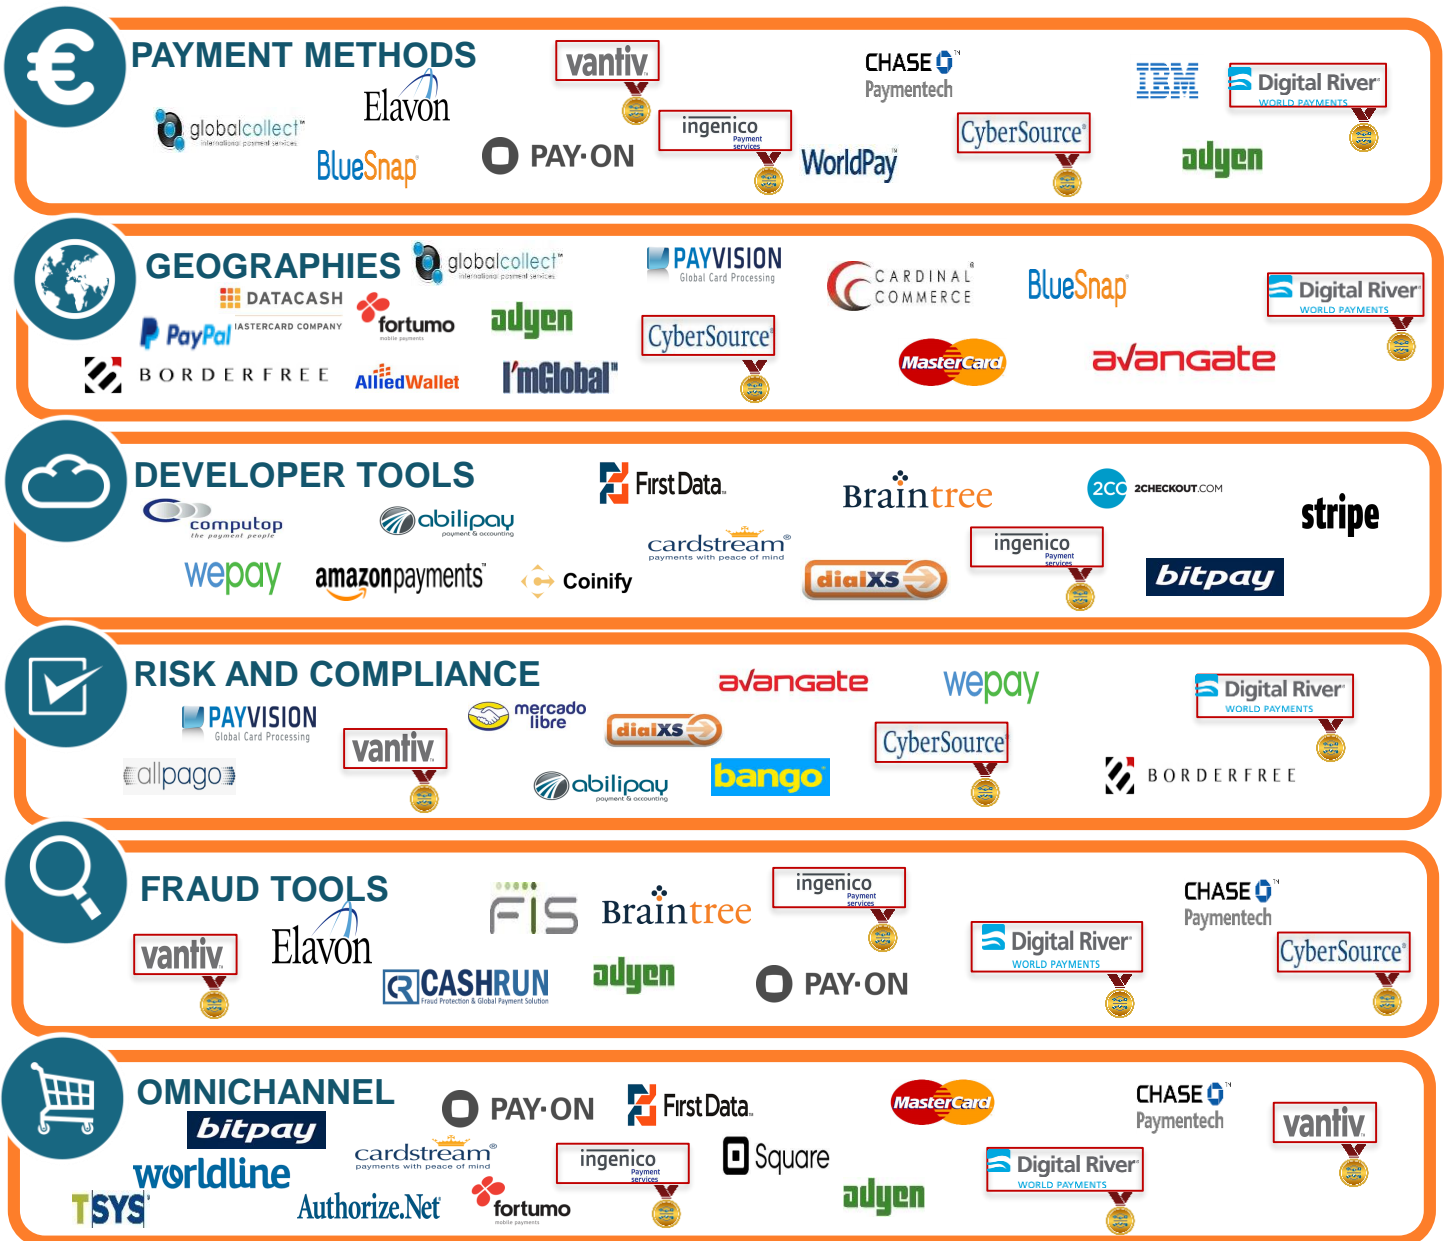

The X-Border November Tracker Updates

In this issue, we've profiled 54 global payment service providers, including four additions to the Tracker: ***allpago, Coinify, Payvision and European Merchant Services***. Of these providers, we also updated four players. Computop was updated with information on tokenization. BitPay and Ingenico's profiles were updated to reflect new omnichannel and developer tools. CardinalCommerce was also updated with information on its omnichannel efforts. Updates to all players results in some adjustments to scores.

THE X-BORDER LANDSCAPE™

The X-Border Landscape™ is a graphic representation of the Top 10 payment service providers in five categories important to optimizing a merchant's cross-border payments operations. The highest ranked providers are listed to the right of the graphic.

Among the four new companies added to the Tracker, *allpago*, *Coinify* and *Payvision* broke into the Top 10 ranking.

Indicates top scoring company in at least 4 categories.
 *Top 10 are based on final scores. There may be ties in each position, creating more than 10 companies per category.

NEWS & TRENDS

PAYMENT METHODS NEWS AND TRENDS

Adyen extension for SAP hybris Commerce to simplify global eCommerce

Adyen, a payments technology company, launched an extension for the SAP hybris Commerce solution. With the extension, merchants using SAP hybris Commerce benefit from a fast integration process, and are able to roll out key local [payment methods](#) around the world, enabling customers to pay in their preferred way, and increasing conversion at the checkout stage. The extension will allow retailers to grow their customer base across markets including Latin America and Asia, with diverse payment methods such as Boletos in Brazil and Alipay in China.

European Merchant Services to process payments for fashion retailer Zalando

European Merchant Services (EMS) signed a three-year agreement with [Zalando](#), an online fashion platform present in 15 European markets, for online payment processing services. EMS holds acquiring licenses for all major debit and credit cards and also allows payments through Bancontact/Mister Cash, a domestic debit card scheme in Belgium, allowing consumers to pay in real-time and guaranteeing payment to (online) merchants and businesses.

IBM revs up real-time payment processing with Financial Transaction Manager

The company [announced](#) that IBM Financial Transaction Manager (FTM) can now enable banks to converge their Society for Worldwide Interbank Financial Telecommunication (SWIFT) payment operations onto a single hub to improve operational efficiency and expedite transactions. IBM's FTM technology already supports 30 percent transmission of financial messages across the SWIFT network. This will further expand the reach of the network worldwide.

Amazon picks Payoneer to facilitate cross-border payments

Amazon picked Payoneer to [expand](#) its cross-border payments option for sellers on its marketplace. Payoneer will serve as Amazon's payments provider for sellers across 24 countries, including the U.S., Spain, France, Italy, Germany and the U.K.

PayCommerce to launch same-day payments for banks in 2016

PayCommerce is [launching](#) a network for banks allowing same-day, account-to-account settlement. The firm will roll out Phase 1 in late 2016, starting with a pilot program between banks in countries that have these capabilities. Phase 2 will include expansion to nine countries.

NEWS & TRENDS cont'd

GEOGRAPHIES NEWS AND TRENDS

JD.com opens office in the U.S.

JD.com, China's largest online direct sales company, opened an office in Silicon Valley, representing its first [office](#) outside of Asia. The location will be a research and development center to enhance technologies related to user experience and allow easier interactions between the company and U.S. retailers, partners and brands seeking to establish or expand their presence in China on JD's shopping platforms.

Alibaba's record-smashing Singles' Day success

Singles' Day, the largest online sale in the world, [racked](#) up \$14.3 billion for retail giant Alibaba, with \$5 billion of that coming within the first 90 minutes. Less than 10 hours in, total gross merchandise value topped \$7.86 billion (RMB 50 billion). The Global Shopping Festival blows Black Friday and Cyber Monday out of the water. To put Alibaba's figures into context, the total amount that retailers took in during 2014's Black Friday was \$50.9 billion. And that was over a four-day holiday weekend. The number of shoppers during the holiday weekend was estimated to be 133.7 million, while Alibaba saw [467 million orders](#) by the end of its 24-hour sale.

Visa buys Visa Europe for \$24 billion

Visa began November on a high note with the [acquisition](#) of Visa Europe for \$24 billion with \$18 billion in upfront considerations and over \$5 billion payable after the fourth anniversary of the closing. The transaction is subject to regulatory approvals and is expected to close in Visa Inc.'s fiscal third quarter of 2016.

ACI acquires PAY.ON, goes cross-border

The electronic payments and banking solutions company ACI Worldwide [acquired](#) eCommerce player PAY.ON in a deal worth roughly \$200 million in cash and stock. For ACI, the deal would bolster exposure to alternative payments methods and card acquirers across more than 160 countries.

NEWS & TRENDS cont'd

RISK & COMPLIANCE NEWS AND TRENDS

Ecommerce Europe brings Trustmark to 11 countries

Ecommerce Europe rolled out Trustmark, a protection [standard](#) for merchants and consumers engaging in cross-border transactions with more than 10,000 certified online shops. Trustmark aims to simplify the communication process between merchants and consumers in the highly fragmented European eCommerce market.

Central banks' proposal to stop global payments fragmentation

Rules that were introduced to stop money laundering and other illegal activities have other collateral damages. Central banks fear that these tougher rules have prompted banks to cut links with other banks across the world (correspondent banking), and reduce the cost of stringent Know Your Customer (KYC) checks. Central bankers worry these trends may be [fragmenting](#) the global financial system and excluding less developed markets and countries from the benefits of cross-border payments.

OMNICHANNEL

Payvision launches Acapture, a global payment platform

Payvision, a world acquiring network, launched Acapture, a new global omnichannel payment service provider. The platform works both in [POS and online](#) environments. The platform will be available to over 25 different countries.

Ingenico brings bitcoin payments to the POS

Ingenico, a French-based global payments provider, has paired up with BitPay to bring bitcoin payments to the [point-of-sale terminal](#). This technology debuted in Barcelona at Blockchain Week (Oct. 8). This payment integration was created by BitPay and installed on an Ingenico terminal ICT250. For those consumers wanting to cash in their bitcoin at the POS, they can do so by showing a QR code, which can be scanned on a mobile phone to make a payment.

NEWS & TRENDS cont'd

FRAUD TOOLS NEWS AND TRENDS

Computop, CardinalCommerce partner to minimize fraud in online and mobile commerce

Payment service provider Computop and remote payments provider CardinalCommerce [partnered](#) to minimize fraud in online and mobile commerce. Through this partnership, Cardinal's rules-based consumer authentication will be available to Computop Paygate customers, providing retailers in the U.S., Europe and other key international markets a secure payments experience for their eCommerce and mobile operations, including cross-border transactions.

Thailand gets mobile payments

Visa's CyberSource, a provider of eCommerce payment management services, partnered with LINE Thailand, a mobile messenger service application to extend mobile [payment](#) services for users in Southeast Asia. The solution also takes care of fraud management and tokenization. LINE's acquirer will be able to process a wider spectrum of mobile payments from multiple card brands and issuers.

Payment authenticator iSignthis ties up with Coinify and Clearhaus

iSignthis, a payment and identification authentication service provider, partnered with Coinify and Clearhaus. Digital currency processor Coinify provides a plug-in for popular merchant-facing eCommerce platforms that allow businesses to accept bitcoin and receive settlement in more than 30 currencies. Under the agreement, iSignthis' Digital [KYC services](#) will be made available to all Coinify users in January 2016. Separately, iSignThis also signed on [Clearhaus](#), an EU payment institution and acquirer, to provide authentication services to Clearhaus merchants in Europe.

OTHER NEWS AND TRENDS

Shipping continues to remain a woe for shoppers

A new study showed that shipping and returns continue to impede online sales. The "[Global Online Shopping Study](#)" by eCommerce solutions provider Pitney Bowes shows major hurdles faced by e-shoppers conducting cross-border eCommerce purchases. With 64 percent of respondents, the major hurdle is high shipping costs. Other barriers include additional fees owed at time of delivery (48 percent), product delivery taking too long (39 percent), complicated online return policies and processes (33 percent), and a lack of localization in payment methods (30 percent).

allpago joins the Cross-Border E-Commerce Community

allpago, the leading payment provider for Latin America (LATAM), has joined the Cross-Border E-Commerce Community (CBEC). The CBEC provides [facts and figures](#), as well as analysis on mature and emerging markets. allpago will provide merchants, payment service providers and financial institutions with better quality and more accurate information on markets in the LATAM region.

Worldpay appears on the London Stock Exchange

Payments processing firm Worldpay listed on the London Stock Exchange in a sale [raising](#) more than £2 billion. The company's flotation is the largest on the London market so far this year. Its shares were initially offered at 240 pounds each, after its private equity owners sold a 51 percent stake in it. The company intends to use the cash to expand into new markets and develop its payments systems.

Digital River Wins Award for Most Disruptive Payments Technology

Digital River [won](#) the FStech/Retail Systems Payments Awards in the Most Disruptive Payments Technology category for its Service Provider Interface (SPI). The Payments Awards honored companies that have launched and/or implemented the most outstanding payments solutions, initiatives and projects during the past year.

ABOUT

X-BORDER PAYMENTS OPTIMIZATION TRACKER™

The PYMNTS.com X-Border Payments Optimization Tracker™ is designed to provide an organizing framework for evaluating the many players that provide merchant payment processing services geared for cross-border payments.

PROVIDER PROFILES

We identified leading cross-border payment service providers by researching numerous industry directories and Google searches. The list of providers will grow over time.

We researched provider websites to gather information on key attributes important to serving the needs of cross-border merchants. Scoring for the X-Border tracker includes:

PAYMENT METHODS – Payment methods, digital wallets, account-on-file, recurring billing, acquirers connected to, and acquirer services

GEOGRAPHIES – Regions served, currencies and languages, and office locations

FRAUD TOOLS – PCI compliance, tokenization, 3D Secure, address verification services, order linking, proxy piercing, transaction scoring, end-to-end encryption, chargeback automation, IP geolocation, device fingerprinting, velocity checks, screening lists, outsourced operations

RISK/COMPLIANCE SERVICES – Export and tax compliance, tax burden, and merchant of record

DEVELOPER TOOLKITS – APIs, eCommerce plug-ins, programming languages, shopping carts, account updater services

OMNICHANNEL – Mobile and tablet POS, number of operating systems supported, and EMV

THE X-BORDER PAYMENTS OPTIMIZATION LANDSCAPE™

The X-Border Payments Optimization Landscape™ is a graphic representation of how the leading payment service providers are scored in each of six categories important to optimizing a merchant's cross-border payments operations. It is not designed to suggest one is more important than another. The Top 10 providers in each category are displayed in rank order from industry standard on the left to best-in-class on the right.
