You can check the historic values of the index in the chart and compare the evolution of the overall index, the index subcategories and each of the individual stocks that are part of the index and any other public company.

You can see a table with the historic values of the overall index by clicking View Historical Data in the summary table above the chart. You can also see the historic values of each of the index subcategories by clicking View Historical Data in the Summary tables below the chart. You can view the historical data for each of the companies of the index by clicking their tickers in the Members tab.

In the tab performance you'd be able to see and compare the Top and Worst performers of the stocks in the index for different periods of time.
